

Din Rail Cutter

320-000 & 320-100

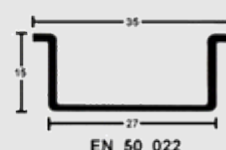

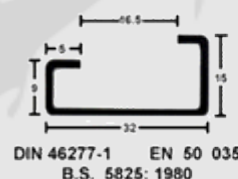

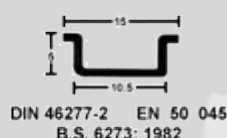

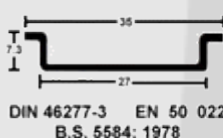

Hand Operated

- ◆ Heavy duty machine for continual use.
- ◆ Available for manual operation (Model 320-000) hydraulic operation (Model 320-100)
- ◆ Include 1m length stop for cutting accurately to length without waste.
- ◆ Incorporates cutters for 4 profiles of rail, plus copper earth rail 10mm x 3mm.
- ◆ Rail is supported during cutting operation to ensure cut is at 90°.
- ◆ Successive operations of the machine are used to punch elongated holes at each end of the rail. One hole is in line with the rail, the other hole is at right angles to the rail.
- ◆ Standard hole size is 6.4mm x 12mm. Alternative punch sizes are available.
- ◆ Easy replacement of punches and dies.
