

## Impact Auger Bits Carbide Tipped

### THE ELIMINATOR

The ELIMINATOR are carbide tipped wood drill bits that have a carbide-tipped cutting tip combined with a hardened steel cutting edge.

This allows the ELIMINATOR carbide tipped wood drill bits to bore holes in all types of wood quickly, leaving little or no residue. A truly clean, smooth hole is produced.

The ELIMINATOR carbide tipped wood drill bits requires less torque to operate and can be used with electric, air, or gasoline powered drill motors and impact wrenches.

The carbide cutter is brazed onto the steel body and the hardened steel cutting edge can be sharpened. The lead screw, shank, and carbide

cutter are replaceable allowing the ELIMINATOR carbide tipped wood drill bits to be completely rebuilt

**Size Ranges from DIA 11mm—38mm**

**Standard Lengths Stocked**

**300mm or 457mm**

**Other lengths available special order**
