

SML Busbar Work-Centre

**CUTTING - PUNCHING - BENDING SOLID COPPER BAR
UP TO 125mm x 10mm**

A Complete work-station with electro-hydraulic pump. (220 volt, single phase), machine selector-switch and 3 separate machines for cutting, punching and bending. The machines are carefully positioned to give free access of the copper bar to each machine.

The work-centre is mounted on robust 200mm wheels. 2 wheels are lockable. Operation of the machines is by means of a double foot-switch so the action of each machine may be accurately controlled.

ELECTRONIC ANGLE CONTROL is available as an optional accessory.

The operator may enter the desired bending angle.

The machine will stop at that angle and then open to allow the copper to be removed.
