

## PVC Offshore Crew Bag

### Features

The Offshore Crew Bag has been designed with one very special purpose - to get you and your gear on/off the Rigs with ease.

Suited and designed around Australian Oil and Gas and mining operations our transit bag features a large main compartment for the bulk of your gear, with two isolated side pockets for your PPE Kit or dirty laundry. The stash pocket on the front works perfectly for your wallet, keys and passport.

PVC construction and waterproof zips throughout make this bag weatherproof, although we do not class it as a 100% waterproof bag. May get some leakage through seams in heavy conditions.
