

Modielive Modiewark Tester

Part Number: MODIELIVEV2

Modielive Features

The Modielive EMF Generator is designed to be used in conjunction with the Modiewark non-contact voltage detector. The Unit produces an EMF (electro magnetic field) which can be detected by the Modiewark to prove the Modiewark is working correctly.

The Modielive produces enough EMF to allow the Modiewark to be tested up to the maximum of 69Kv setting on the switch plate of the tester.

The Modielive can be packaged with a Modiewark non-contact voltage detector for a complete and confident testing solution.
